Bonjour Madame,

Nous avons bien reçu votre courriel au sujet de la construction autour de l'école Jules Verne.

We understand your concerns, but unfortunately, the city of Vancouver is in charge of their construction sites. We have no control over their organisation. That being said, I would strongly recommend you talk to your principals (Pierre Bibeau and Alain Arbour) about your safety concerns. They are there to support you as well and make sure of the safety of the students at their school.

As for school school catchment, it is not something that is part of our present discussions to modify the zones.

Sincèrement,

Pascale Bernier

Bonjour,

I have a son and daughter currently in the CSF with my daughter at Ecole Jules-Verne. I am very concerned about the construction around JV. I feel it is very unsafe and will only get worse. My son is in grade 5 and I am very concerned about him continuing his education at JV in the future with the construction and demolition that will be taking place. Would École Andre-Piolat (Secondaire) ever open its school catchment to Vancouver North-East? I am just trying to plan for the future for my son. What are the barriers of opening the catchment of Andre-Piolat to include parts of Greater Vancouver?

Cordially,

Erin Ames
